

Soft Bars service program

ATV Four Play would like to offer all Soft Bar owners a winter or “off season” service program.

If you send in your Soft Bars, we will thoroughly inspect, clean and provide the 2010 stud updates. What does this mean? In our 2009 testing and R&D we have found that in a hard crash or if the bars are not completely tightened on to an aftermarket stem the 10mm studs can bend. So we have a new, stronger method of securing the Soft Bars to your aftermarket steering stem.

So, if your Soft Bars have 10mm studs that look like this:

OLD style

NEW Style

Send them back to us for the updates and we will inspect, clean and replace the dampening bushings, the O rings and grease the Soft bars for a low cost of \$25.00. This includes shipping back to you.
